INSTALLER NOTES

- Sloped walls: Above wall L is a positioning guide: for each piece, how far its top rises past the line it starts from, at the LEFT edge of the strip, overage included: the ceiling line for full and above pieces, the window sill for below pieces. Set the top by that number and the pattern grid stays level.
- Strips 3, 4, 5, 10, 11, 12 go up in two pieces around an opening: piece a above, piece b below. Cut each pair from one continuous length, a first, so both halves keep the same batch and the same pattern run.
